Now, you are equipped with some great information about what you currently have and what is being offered by other companies. Before making any sort of a switch be sure to call your existing company to let them know that Company XYZ is able to offer you a great deal and see if they have any current promotions or are able to beat Company XYZ's offer. If so go ahead and agree to their new terms, if not call the completion to confirm the details of their plan, switch, and start saving money!
